Authors' manuscript submission checklist

What should be borne in mind when preparing a paper for publication

To make the **publication time as short as possible**, authors are requested to pay special attention to the **layout of the paper**. Issues of the current year should be consulted. The full instructions are published annually in the January issue of the Journal and are available through the Internet at <http://rcb.ioc.ac.ru>. The following points are essential.

General

1. Documents submitted to the editorial office

1.1. The surname, first name, and position of the person with whom the editors should communicate (postal address, telephone number, fax, e-mail address). The surname of the author to whom correspondence should be addressed should be marked by an asterisk.

1.2. The manuscript itself, an abstract and figures and tables in separate pages (all in duplicate) (see clauses 2.1 and 2.2 of the Instructions and Appendices 1 and 8).

1.3. A structured list of words for the subject index (see clause 2.3 of the Instructions and Appendix 2).

1.4. A graphical abstract (in duplicate, see clause 2.4 of the Instructions and Appendix 3).

1.5. The **running title** consisting of no more than 45 characters including spaces (see clause 2.5 of the Instructions and Appendix 4).

1.6. All the above items submitted as computer files on a floppy disk (see Appendices 5 and 8).

1.7. The application form with the description of the content of the floppy disk (see Appendix 6).

1.8. The signed copyright transfer agreement (see Appendix 7).

1.9. Information on the authors (see clause 1.5.7 of the Instructions).

1.10. Written permission from the person whose unpublished work or private communication is referred to in the paper.

2. **Only for brief communications and letters to the editor:** the size of the manuscript should not exceed eight or four typewritten pages, respectively (three figures are equivalent to one page).

3. **The arrangement of the parts of the paper** (except for letters to the editor):

title of the paper

author(s)

full name of the scientific institution

postal address and postal code

fax

electronic mail address

abstract

key words

the body of the paper

introduction

task setting

for papers in physical chemistry

Experimental

Results and discussion with a conclusion

for papers devoted to synthesis

Results and discussion with a conclusion

Experimental

acknowledgments

references (on a separate page)

the other items listed in clause 1 should also be enclosed.

Requirements to the drawing-up and preparation of the manuscript

4. The **Experimental** section should contain data confirming the structure and purity of all newly synthesized compounds, sources or procedures for the synthesis of the **nontrivial reagents** used, and the conditions of the **additional** preparation of reagents and solvents (see clause 11 of the Appendix 8).

5. Each synthesized compound should be **named according to IUPAC** rules. Organometallic complexes may be named according to *Chemical Abstracts* nomenclature (see clause 8 of the Appendix 8).

6. All **tables, schemes, figures, compounds, and references** should be numbered strictly in the order in which they appear in the text.

7. **Both designations and units of measure** of the corresponding values should be indicated on the axes.

8. Spectra should **not** be drawn **by hand**.

9. All **abbreviations** and **contractions** should comply with the list presented in the Instructions for authors (see Appendix 9) or expanded when mentioned for the first time.

10. X-Ray diffraction data should be presented as patterns of molecules (with numbered atoms) or crystal packings and tables containing **necessary** geometric characteristics of molecules (**selected** bond lengths and bond and torsion angles). Full tables of atomic coordinates, thermal factors, and full tables of bond lengths and bond angles will be deposited at the Cambridge Structural Data Bank. For this purpose, in addition to the printed **full tables** enclosed as an appendix to the paper (*not for publication*), authors should enclose a separate floppy disk with files named **filename.res** or **filename.cif**, corresponding to the ultimate structure refinement, and comments matching particular structures in the text to particular files (see clause 12 of the Appendix 8).

11. The main body of the paper (see Appendix 5 to the Instructions) should be typed using the TimesET font; Greek characters should be entered using the Symbol font; automated systems for arranging references or footnotes should be avoided. The submitted hardcopy should correspond **exactly** to the electronic version. The following symbols should be distinguishable: the Roman character "l" and the numeral "one" (1), the capital letter "O" and the numeral "zero" (0). Please, be careful and do not use Roman and Cyrillic characters within one word. The tables are a part of the text and should not be created as graphical objects. It is undesirable to use the space key to align the cells of tables.

12. The text should be typed in **double line spacing (size 12—13 points) and with 4-cm** margins on the left.

13. Characters for physical variables (for example, temperature *T*) but not units of measure (K), stereochemical descriptors (*cis*, *Z*, *R*), locants (*N*-methyl), and letters (but not numerals) in the designations of groups of symmetry should be typed in *italic* (C_{2v} , but not C_{2v}).

14. The oxidation numbers of compounds with the names of elements should be typed in SMALL CAPS and enclosed in parentheses (iron(II)), and the oxidation numbers with the symbols of elements are to be given as superscripts (Fe^{II}).

15. **Each reference** mentioned in the list of references should also be mentioned in the text. **References** in the text are to be typed in **Bold** as **superscripts**; the numbering should strictly correspond to the order in which they are mentioned.

16. Only standard abbreviations of journal titles may be used in **the list of references** (see Appendix 12).
